Art Unit: 2826

Serial Number: 10/024154

Attorney's Docket #: NEKW.19.286

Filing Date: 12/18/2001

Applicant: Ohno, Tsuyoshi

Examiner: Pershelle Greene

DETAILED ACTION

1. Applicant's election without traverse of Species I in Paper No. 7 is acknowledged. Applicant elected to have Species I, claims 1-14, 18-20, and 24 examined. Examiner does not agree with the election of claims in reference to Species I. Please take note that claims 9, 14, and 20 are being withdrawn from consideration. These claims do not relate to Species I.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the multi-layered structure having a cell forming layer and a pad forming layer as well as the macro-cells must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Art Unit: 2826

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 121. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claim 1 is being rejected under 35 U.S.C. 102(e) as being anticipated by Takamori Kazuo (JP 2000-100955).

As to claim1, Takamori discloses a semiconductor integrated circuit device and its design method having all of the claimed subject matter:

Art Unit: 2826

- A. "input and output cells ... with macro-cells" is met by the input/output cells 2 formed in the cell forming layer together with macro-cells shown in figure 1;
- B. "power supply pads ... said input and output cells" is met by the pads (located in the inner region 3) formed in said pad forming layer, and electrically connected to said input and output cells shown in figure 1; and
- C. "signal pads ...of said power supply pads" is met by the pads 5 formed in said pad forming layer, electrically connected to said input and output cells 2, and arranged outside of power supply pads (located in the inner region 3) shown in figure 1.

Claim Objections

6. Claims 1-8, 10-13, 18-19, and 24 objected to as being dependent upon a rejected base claim.

Conclusion
